

New Old Castle Products for 2016

FLAGSTONE WALL AND EDGER

Available in 2 colors: Ashland and Allegheny

Product Name: Tumbled Flagstone Wall

Dimension: 4" x 11.6" x 7.3"

Weight (avg): 23 lbs per unit

Pallet Qty: 120 units

The Tumbled Flagstone Wall is very versatile. It can easily create straight walls, concave or convex curves. Designed to create a wall that looks just as good from the back as it does from the front. Great for sitting walls visible from both sides while the natural stone texture is on 5 sides for a complete natural stone look. Install in a seamless pattern to eliminate unsightly gaps on the back of the wall. The top row (course) installed in a continuous, gapless pattern, eliminates the need for extra caps.

EDGERS AND EDGING PRODUCT

Available in 1 color: Ashland

Product Name: Empire Edger

Dimension: 15.5" x 3.5" x 5"

Weight (avg): 19 lbs per Unit

Pallet Qty: 135 Units

The Empire edger creates functional Old-World charm with natural textures on the top and all sides. Easy to install and ideal for using as a decorative edging around landscaping projects.

STEPPING STONES

Log Round Stepping Stone

Available in 1 color: Natural log brown

Dimension: 18 inches

Weight (avg): 32 lbs per unit

This stepping stone is 18" around and looks like a cut piece of log from a tree. What a great addition to any landscape to easily install a walking path that has a natural look.

Pallet Qty: 44 Units

Japanese Stepping Stone

Available in 1 color: Adobe

Dimension: 14 inches x 18 inches

Weight (avg): 30 lbs per unit

Pallet Qty: 66 Units

This stepping stone is 14" x 18" and has a natural modeled top that gives it a natural old world look. What a great addition to any landscape to easily install a walking path that has a natural look.

BASIC FLAGSTONE FIRE PIT KIT

|Available in 1 color: Ashland

Dimension: 36 inches of Flagstone Wall Blocks

Weight (avg): 800 lbs per Unit

Pallet Qty: 1 Unit

Fire Pit Kit comes with enough blocks and a 7 gauge steel insert to completely build a nice fire pit for the home landscape. There are additional materials needed in order to complete the building of your fire pit. They are a tamper, level, leveling sand, 2 tubes of concrete adhesive, caulk gun, riverbed gravel, shovel, optional marking paint and some good old hand labor. Total installation time should be no longer than 1-2 hours and then you can have a wonderful addition to your landscape.
