## Ton vs Yard

---

*Important Consumer Information for purchasing sand, stone or gravel.*

Ton versus Yard or Yard versus Ton.....Who is the winner?

Well actually, there is no winner.

The difference is this:

A **Cubic Yard** of sand, stone or gravel equates to approximately **2,700 LBS.**

A **Ton** of sand, stone or gravel equates to **2,000 LBS.**

Some other landscape supply companies sell by the ton....**WE SELL BY THE YARD!**

**You get 33% more product for your money when purchasing by the yard.**

Please compare pricing by multiplying your tonnage price by 1.3, this will give you an apples to apples comparison of pricing to our per yard price.
